

## Be Winter-Ready

In light of the severe weather events that have taken place across Ireland during the past number of years a national programme providing advice on how to prepare for such events and how to deal with certain eventualities has been developed.

The link to the Website [www.winterready.ie](http://www.winterready.ie) provides access to a wide range of information including on how to be prepared in the home, including dealing with freezing temperatures, clearing snow, dealing with floods, tips on Road Safety, contact details etc.
