

## Bunbeg/Derrybeg

Commenced in 2001, this Phase of works provided for the upgrade of the stretch between the villages of Bunbeg/Derrybeg which were the subject of earlier regeneration schemes. This Phase provided for the undergrounding of overhead cables, provision of stone boundary walls, railings, street lighting, street furniture and renewal of footpathing.

The enhancement works for the stretch linking Bunbeg/Derrybeg continue to be carried out on a phased basis. The first phase of the new Schedule of Works, due to commence in early 2007, will provide for the provision of storm drainage, footpaths and the removal of ramps. The provision of proper traffic calming measures, fencing with foundations laid for stone walls, modification or repair of stone walls, fencing, railings and stone pillars will be completed in future phases.
