DONEGAL COUNTY COUNCIL
RECEIVED
31 MAY 2022
CORPORATE DONEGAL PSC

Dear Sir/Madam

We are commenting as follows on the current and next Co. Development Plans regarding wind energy in County Donegal.

We firmly agree with and support the Councillors from the Glenties Electoral Area and other areas of the County.

These Councillors have already proposed that Freshwater Pearl Mussel catchment areas, Areas of Especially High Scenic Amenity including St John's Point, Gweebarra River Valley and areas prone to landslides will be EXCLUDED from areas open to wind farm development in the 2018-2024 and 2024-2030 County Development Plans.

We want the traditional rural small farming community to remain as it is and we do not want the area to be industrialised with wind farms.

We hope the Council Planners will understand and respect our wishes.

Thanking you
Yours truly
