DO YOU KNOW?**

At the chance of your child dying from Diphtheria is twenty-six times greater if you neglect to have him immunised?

Diphtheria is spread by a germ which is carried by the healthy and unhealthy? It strikes rich and poor alike, strong and weak. Your child may encounter the diphtheria germ at any time and in the most unexpected places, and the only safe way is to prevent your child contracting the disease by the simple process of immunisation. Only immunisation protects;

At the child under five is in grave danger of all; so immunisation should be completed early, and the time is just before the first birthday? (If this was not done, now).

Immunisation is painless, simple and FREE for all? Ask particulars at your local dispensary.

ACT NOW. It is your duty to stand between your child and the danger which threatens. **DIPHtheria COSTS LIVES IMMUNISATION COSTS NOTHING.**
