

To whom it may concern,
I think that windturbine development applications should not even be considered in areas of high scenic amenity. Donegal relies on tourism and in general tourists do not travel to places where there are a lot of turbines as it takes away from the beauty of the environment. I have already witnessed some savy tourists who look up wind turbine presence before booking a holiday.

I am also very unhappy about the impact on wildlife when there is a turbine development. It is well documented that all wildlife suffers in the area particularly the bird population. Another really tragic consequence of wind turbine development is the far reaching negative effects on the host community. I have witnessed this personally on many occasions. Turbines destroy communities and turn neighbour against neighbour !

The future for turbines is off shore please do not ruin a beautiful landscape for the benefit of a few and the detriment of many.

Your sincerely.
Scarlet Fahy
